

## Cloud-Based Online Platform

Bridge is the intelligent online platform for remote management and administration of PTCarPhone devices over the Internet.

Be it just one PTCarPhone or an entire vehicle fleet. Bridge makes it so easy to handle device settings and manage the phone books and contacts. All you need is an Internet-enabled device, such as a smartphone, tablet or PC.

All PTCarPhone 6 models allow positioning via GPS, GLONASS and Galileo. This enables you to determine the position of your vehicle at any time.

The position can then be displayed in an interactive map on the Bridge online platform. The position can also be queried by a text message. All you need to do is send a short command sequence by text message to the PTCarPhone. You will then receive an answer message with the appropriate position data.

- Free of charge
- I/O configuration
- Phone book administration
- Data synchronisation
- Device configuration
- Software update
- GPS real time positioning
- Map view
- Device status
- Encrypted transmission

*"Benefit from the exclusive advantages of a car phone for fixed installation."*

## High Quality LTE Communication

The PTCarPhone is the right choice for anyone who wants to retrofit their vehicle with a hands-free system and always sets the highest standards. Two connections for a MIMO outdoor antenna guarantee excellent LTE reception. Thanks to VoLTE and the proven Clear Voice & Sound Technology, phone calls are now clearer and more natural. The PTCarPhone is clearly a cut above Bluetooth® solutions.

- Retrofit LTE communication system for fixed installation in vehicles – no risk of loss
- VoLTE support with excellent audio quality as well as echo and noise cancellation
- Share mobile Internet via WiFi with the WiFi hotspot feature
- Removable handset and option to connect a second handset
- Optimum reception quality due to connection for an external LTE MIMO antenna
- Integrated location module (GPS, GLONASS, Galileo)
- Remote management of phone books and device settings with the Bridge online platform – <http://bridge.peitel.de>
- Large phone book memory for up to 5,000 contacts
- Individually adjustable restrictions
- 6 digital I/O ports for professional functions
