

NEXT GENERATION FLEET COMMUNICATION

Uniden® CP250

Tablet Style Vehicle Communicator

The Uniden CP250 is the first LTE all-in-one fleet communications device for cellular voice calls, push to talk over cellular, navigation, data applications, built in camera, DVR and more.

This device was designed to be installed on the dash or mounted on a windshield, specifically for lighter commercial vehicles such taxis, vans and delivery trucks. The tablet based design makes installation a breeze and ensures safer communication for professional drivers.
